6-21-95

Dear Fellow Researcher,

I am asking your help in a project that I would like to assemble. I would like your thoughts as to the effects of the assassination of John F. Kennedy, on both yourself and the nation. These statements should be rather short in length and could be from something you have already written and published. I have been studying the assassination now over three decades and would like to compile your statements. Eventually I hope to offer a collection of these profound statements in a book.

Please send replies to:
